

AERIAL PHOTOGRAPHY

Bluesky maintains coverage of the whole of Great Britain on a 3-year rolling update programme. All aerial photography is now captured at 12.5cm nationwide as a minimum with the majority of areas now upgraded from 25cm coverage. Bluesky has invested in the latest airborne camera technology ensuring the quality, accuracy and consistency of its imagery is of the highest quality. All Bluesky aerial photography is processed using a true ortho processing method which means that all image distortion such as building lean has been removed. Coverage of Great Britain is available off-the-shelf through fast delivery and flexible licensing terms.
